

NC160 Central Equipment Module

DESCRIPTION

The NC160 Central Equipment (CE) Module is scalable so that up to 20 CE modules can be networked together. Each CE module provides connections and power for 64 room controllers and up to six master stations. (Limit of 4 master stations on a CE module when LI484P5 4-LED multicolor dome lights are connected.)

CE modules can be stacked on a shelf, or rack mounted. The NC160 CE Module includes two field-replacable back-up batteries that provide system power during the facility's switchover to emergency generator power. TekTone's LS450 Config Tool software is also included with purchase of an NC160 module.
